ISBN:978-93-5526-896-9

(P.T.00)

Contents

- 1 **Application of Music Genre Classification using Machine Learning Algorithms** 1 - 16
Dr B V Subba Rao
- 2 **Applications of Artificial Neural Network on Digital Speech Signal Intelligibility Improvement or Noise Reduction** 17 - 35
K. Pavan Kumar
- 3 **Cognitive Computing Over Artificial Intelligence** 36 - 45
A.Sarvani, B.Venugopal, S.Jyothi
- 4 **AI in Cyber Security** 46 - 52
Dr.B.Srinivasa Rao, Mrs. J.Geetha Renuka, Ms. Kethe Yamini
- 5 **AI for Facial Emotion Recognition** 53 - 59
Mrs.M.Hema Latha, Mr.S.Siva Rama Krishna, Mr.D.Likhith Reddy
- 6 **Artificial Intelligence in Farming** 60 - 66
Mr.Sk.Saida, Ms. Chandana Pamidi, Mr. Michael Sadgun Rao Kona
- 7 **Artificial Intelligence in Healthcare** 67 - 72
K. Phaneendra, V. Venkata Rama Manoj, Ms. Dodda. Lakshmi Sowmya
- 8 **Artificial Intelligence in Education** 73 - 78
Mr.Rajasekhar Kommaraju, Mr. G. Rajendra, Ms. Dara Manogna
- 9 **Artificial Intelligence in Robotics** 79 - 84
Mr.Ch.Sambasivarao, Mr.P.Arun Kumar, Ms. Rokkam. Shalini
- 10 **Artificial Intelligence in Agriculture** 85 - 90
Mr. V. V. Krishna Reddy, Mr. Praveen Kumar
- 11 **Analysis on Artificial Intelligence Applications in Cryptography with Vulnerabilities Detection** 91 - 101
Y. Suresh
- 12 **Applications of an Artificial Intelligence Based on Machine Learning in Agriculture** 102 - 119
M. Rajesh Babu

Abstract

As Robots are concerned with the connection between precertification and accession, Artificial Intelligence plays a central role in Robots when it comes to that connection. The central question in Artificial Intelligence is: what is the knowledge needed in the big apple area of wonder? How should that knowledge be presented? And how should it be used? Rather than developing AI for purely cognitive problems, often in toy kingdoms, robots challenge it through engaging in real-world activities. Techniques and presentations developed for pure cognitive problems need not be expanded to meet the challenge. AI has contributed significantly to the design of each component of robots. We review contributions made by AI to certification and object-oriented reasoning. Space, path-planning, uncertainty, and compliance are part of Object-oriented reasoning. As a final, we present examples through which we believe that it would be worthy of being given that robots as reasoning or problem solving capabilities which we hope are worthy goals for both Robotics and Artificial Intelligence.
